

# Loch Lomond II

## 2 BR, 1.5 BA

The Loch Lomond II is a very versatile plan. You may choose a plan with a separate dining room or a plan with a den. A huge living room can be used for more formal entertaining. An insulated sliding glass door lets the sunshine in and leads to a private patio area. Across the complete rear of the home is a country kitchen family room. Here is the gathering place for the whole family. Here, too, a sliding insulated glass doorwall opening to the private patio area. The kitchen is complete with appliances, and stainless steel sink with natural light from a large window. There's a pantry for additional storage, a powder room with vanity and mirror is a first floor feature as well.

Upstairs, there are two large bedrooms. The master bedroom has a deep walk-in closet. A full bath has ceramic tiled floor and tub area and large vanity with mirror.

The Loch Lomond II has a full basement with laundry tub. Air conditioning is a luxury touch and insulated windows add comfort. The Loch Lomond II is a great choice for the small family.
